

Greenstar Heat Interface Units

An overview guide on our Greenstar KE and E range.

Meet the next generation Heat Interface Unit (HIU)

Designed with the future in mind

The Greenstar HIU is part of a market-leading range of innovative energy-saving heating and hot water solutions from Bosch Thermotechnology Ltd.

The Greenstar HIU provides domestic hot water and space heating to properties that are serviced from district heating or centralised boiler plants, and is fully compatible with the Bosch Commercial and Industrial product range.

- Innovative design
- User-feedback
- Accurate control
- Bosch quality

Manufactured in the UK

The Greenstar HIU

Call our design team: 0330 123 3004

District heating on any scale

Small and large scale solutions

The Greenstar HIU is perfect for both small and large scale district heating solutions. This includes flats and other multi-residential accommodation, as well as buildings that use uneconomical electric heating, or have individual gas appliances in each property.

A centralised heating concept allows investors to take full advantage of a low carbon heat source or a modular/hybrid configuration with high efficiency condensing boilers.

The Greenstar HIU is also compatible with Bosch Commercial and Industrial products for both new and existing multi-purpose and multi-residential buildings, as well as large estates that include commercial units.

Custom solutions...

from Europe's market leader in heating and hot water systems.

District Heating Design Team

Turn to page 11 to learn about how our team can design the complete system for your new build.

All the properties contractors look for

- Separate first fix rail pipe work jig
- Top and bottom connections with optional pre-made pipe work kit
- Insulation as standard
- Pre-set adjustable ERP pump with inbuilt pump kick
- Flushing bypass and security fixings available as accessory
- Inbuilt filter and DHW temperature limiter
- Mbus meter connection point
- In built pre-payment function – no need for external valves
- Keyless filling link available as an accessory
- Easy to install with in-line compression fittings, or with 3/4"MBSP fittings on the district connections, and can be installed in a small area
- Weighs 33kg*
- A DHW valve prioritises the temperature at the DHW heat exchanger for maximum comfort
- Controlled water temperature in the heat exchanger reduces the risk of limescale formation
- Supplied with or without heat meter to suit specific requirements
- At our training academy, we can test your specific design parameters against our HIUs, while demonstrating its performance
- Bosch employed and trained engineers providing national coverage
- Quick on-site engineer response time
- Contact centre open 364 days a year.

*Without cover and first fix rail.

4 | Worcester Bosch HIU

Delivering for investors

- The automatic control of the return temperature maintains the district heating scheme requirement for low return temperatures
- High differential pressure tolerance of 800mbar (without DPCV) and up to 4000mbar (with DPVC)
- Adjustable secondary flow temperatures for low temperature heating
- Maximum heating and DHW temperatures set by the commissioning engineer
- Low return temperature in the primary circuit maximises efficiency in the system, saving energy
- Internal insulation standard on all models
- Models with heat meters for measurement of heat energy used in individual properties.

All models are insulated with EPP on the front and rear of the appliance.

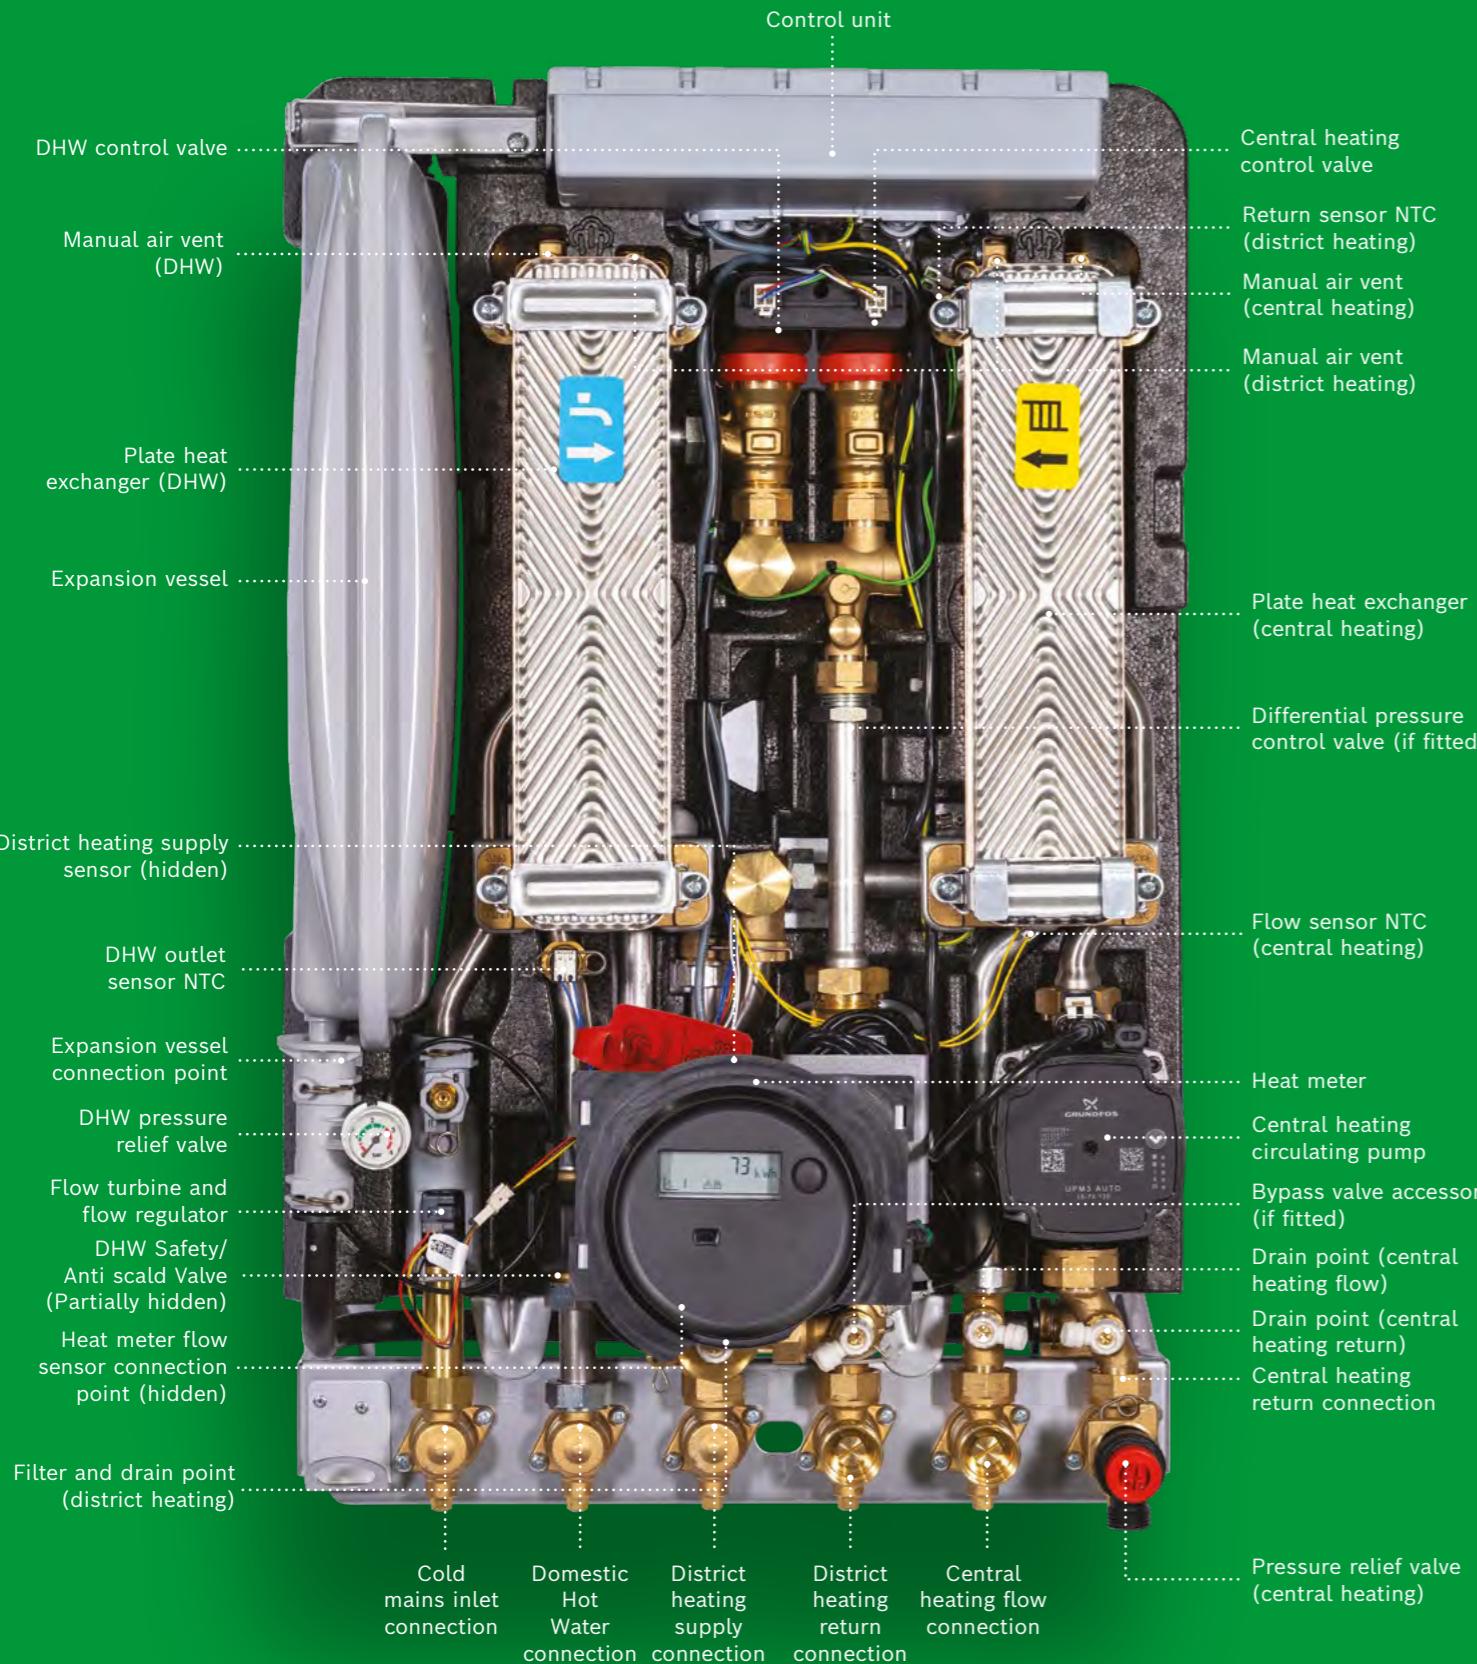

Simple adjustment and setting of DHW and CH which can be fixed at commissioning or controlled by a compatible controller.

Heat meter.

Under the cover Greenstar HIU KE

Dimensions and clearances

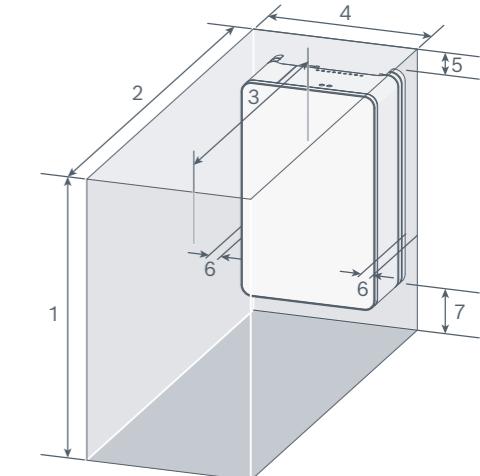

Dimensions and hydraulic connections

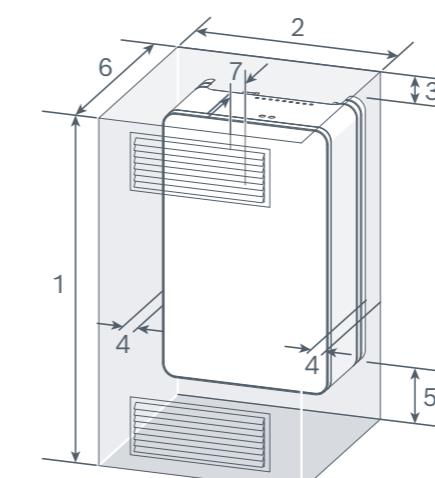

Key	Description	Connection (mm)
1	Cold mains inlet	22
2	Domestic Hot Water outlet	22
3	District heating supply	22
4	District heating return	22
5	Central heating flow	22
6	Central heating return	22
7	Pressure relief valve	15

Minimum installation and maintenance clearances

Key	Description	Dimensions (mm)
1	Overall clearance height	930
2	Overall clearance depth	870
3	In front of appliance	600
4	Overall clearance width	450
5	Above the appliance	30
6	Either side of appliance	5
7	Below the appliance	200

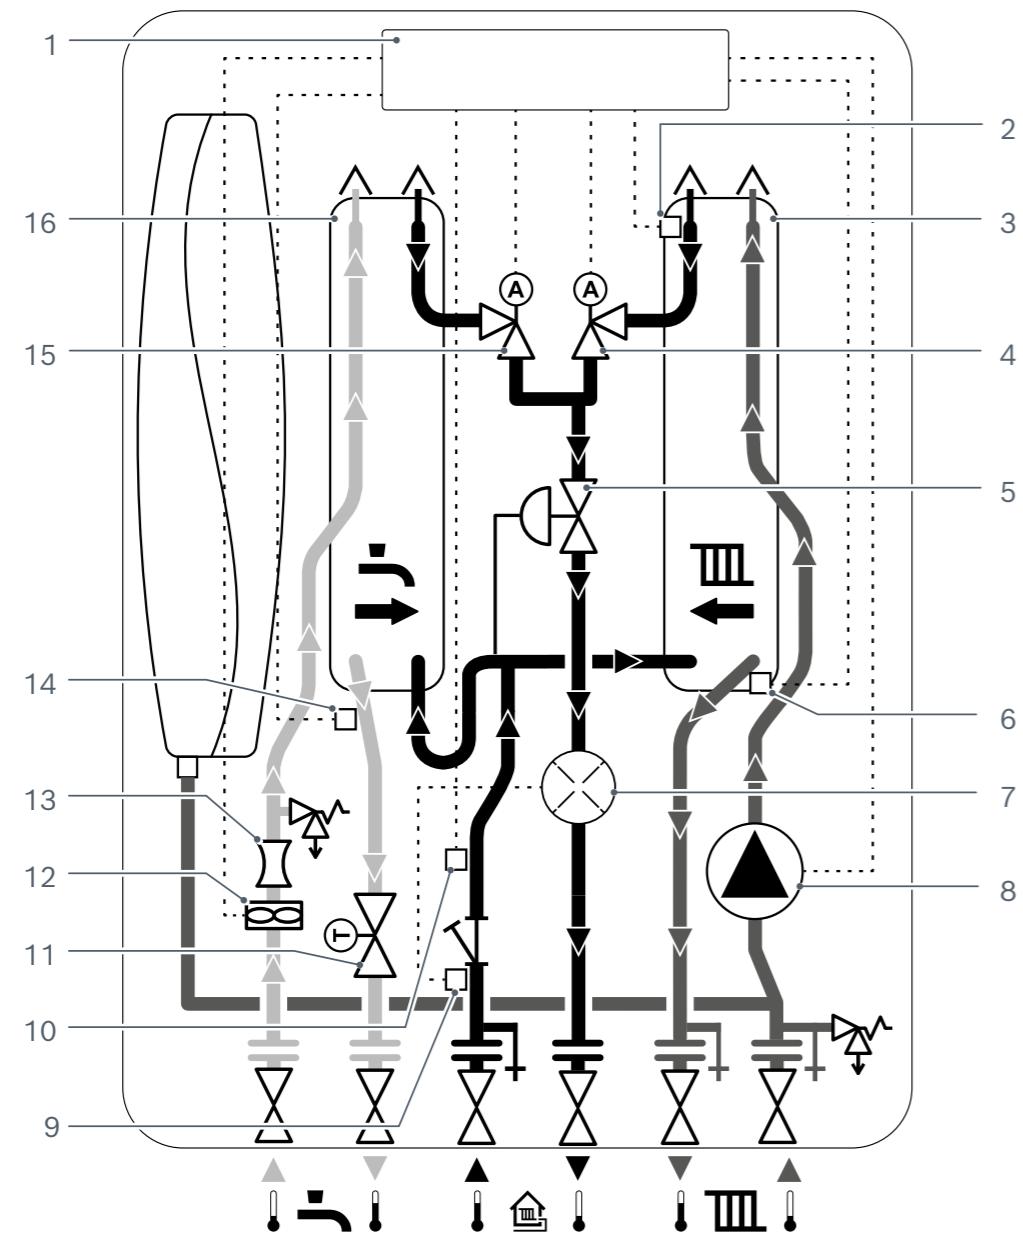

Minimum compartment clearances

Key	Description	Dimensions (mm)
1	Compartment height	930
2	Compartment width	450
3	Above the appliance	30
4	Either side of appliance	5
5	Below the appliance	200
6	Compartment depth	290
7	Appliance to removable door	20

Internal schematic

Key	Description
1	Control unit
2	Return sensor NTC (district heating)
3	Central heating plate heat exchanger
4	Central heating control valve
5	Differential pressure control valve (if fitted)
6	Flow sensor NTC (central heating)
7	Heat meter
8	Circulating pump
9	Heat meter flow sensor connection point
10	Supply sensor NTC (district heating)

Key	Description
11	Domestic Hot Water safety valve
12	Flow turbine
13	Flow regulator
14	Domestic Hot Water outlet sensor NTC
15	Domestic Hot Water control valve
16	Domestic Hot Water plate heat exchanger

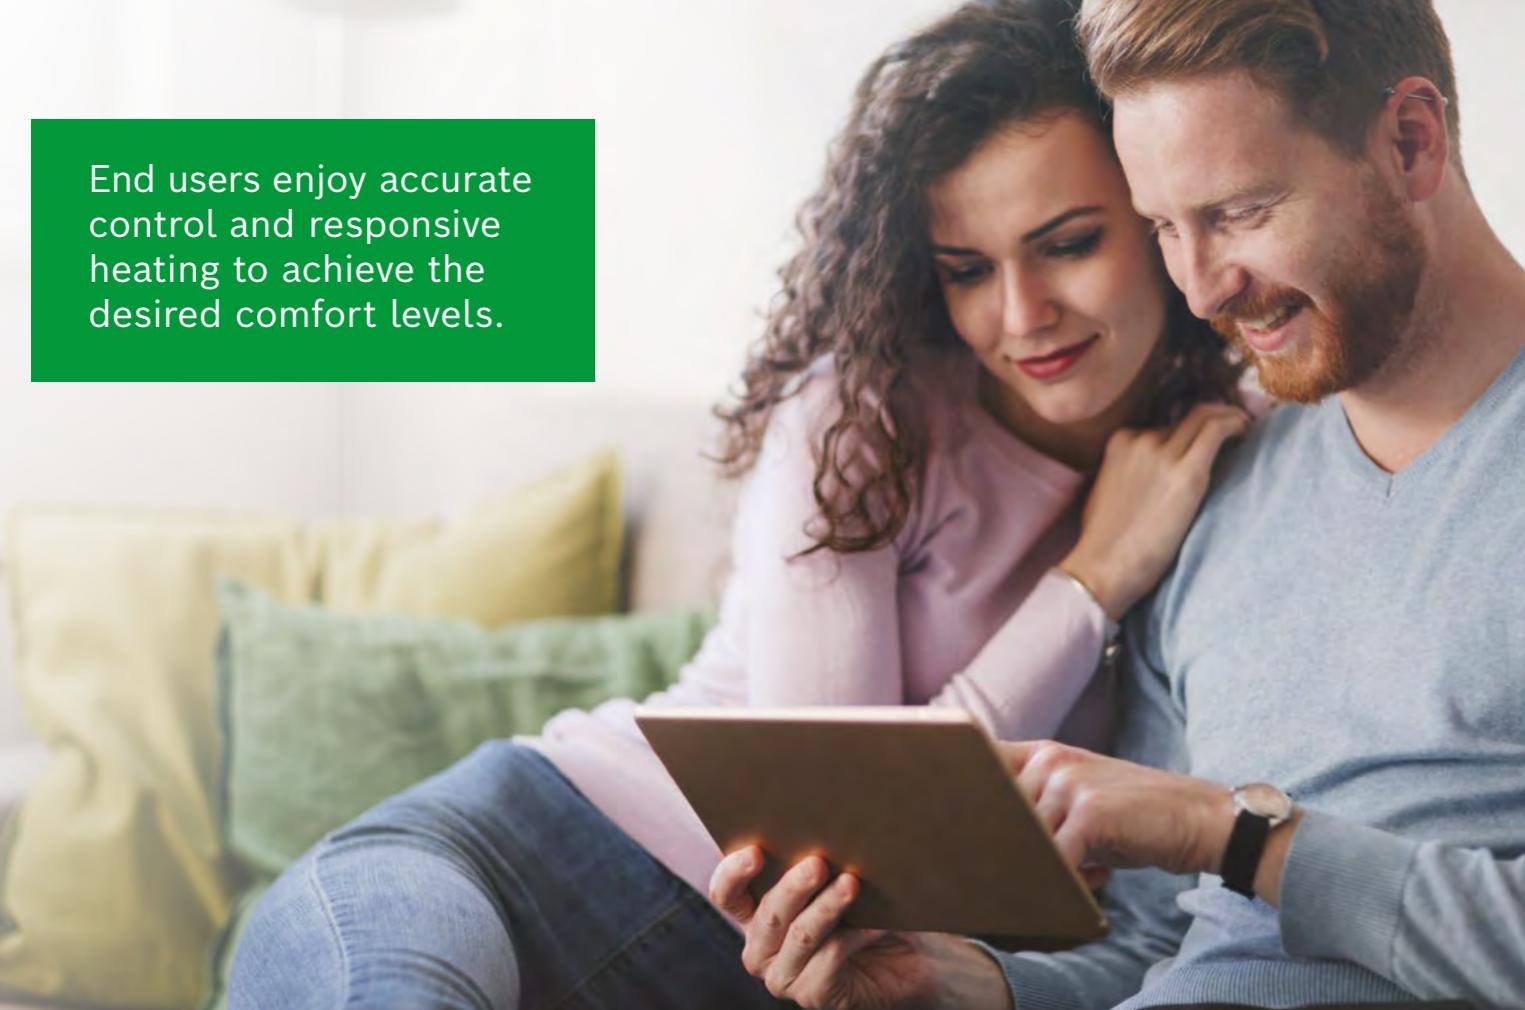

Technical data

General Information	Units	Greenstar HIU KE with Heat Meter	Greenstar HIU E with Heat Meter
Height	mm	700	700
Width	mm	440	440
Depth	mm	270	270
Total unit weight (lift weight)	kg	33	31
Packaged unit weight	kg	36	34
Maximum output to domestic hot water ¹⁾	kW	72.7	51.4
Output range to central heating	kW	1-15	1-15
Maximum flow temperature secondary heating	°C	80	80
Maximum flow temperature DHW	°C	60	60
District heating flow and return connections (compression)	mm	22	22
District heating flow and return connections (flat faced)	inch	3/4"MBSP	3/4"MBSP
Secondary heating flow and return connections (compression)	mm	22	22
Cold feed and DHW connections (compression)	mm	22	22
Pressure relief valve connection	mm	15	15
Maximum working pressure district heating side	bar	10	10
Pressure relief valve setting secondary heating side	bar	3	3
Maximum working pressure domestic hot water side	bar	10	10
pH value (district water supply), approximate		7-9	7-9
Expansion vessel	l	5	5
Expansion vessel charge	bar	0.75	0.75
District Temperature (80°C)			
Primary flow rate	l/s	0.225	0.153
Primary return temperature	°C	17.7	19.0
Primary pressure drop	kPa	20.0	11.5
DHW output (50°C)	kW	58.6	39.1
DHW flow rate (50°C)	l/min	21	15
District Temperature (70°C)			
Primary flow rate	l/s	0.213	0.18
Primary return temperature	°C	22.7	25
Primary pressure drop (including heat meter)	kPa	40.4	29.8
DHW output (50°C)	kW	41.3	33
DHW flow rate (50°C)	l/min	15	12
District Temperature (60°C)			
Primary flow rate	l/s	0.248	0.2
Primary return temperature	°C	27.6	29.8
Primary pressure drop	kPa	54.6	36.4
DHW output (50°C)	kW	33	24.8
DHW flow rate (50°C)	l/min	12	9
Electrical			
Electrical power supply voltage	AC...V	230	230
Frequency	Hz	50	50
Maximum power consumption	W	41.3	41.3
Standby power consumption	W	3.1	3.1
Appliance protection rating	IP	40	40

1) Nominal output at 90°C primary and 60°C DHW.

2) Sized for up to 15kW radiator systems.

End users enjoy accurate control and responsive heating to achieve the desired comfort levels.

Features of the Greenstar HIU range

Greenstar KE	Greenstar E
21 litres/min flow rate	15 litres/min flow rate
Electronically controlled internal valve	Electronically controlled internal valve
Integral pressure balancing valve (DPCV) as standard	Integral pressure balancing valve (DPCV) as accessory
Ability to remotely isolate unit (with heat metering partner)	Ability to remotely isolate unit (with heat metering partner)
Summer bypass as accessory	Summer bypass as accessory
Customer access to heat meter data	Customer access to heat meter data
Ability to fit anti-tamper screws to the casing	Ability to fit anti-tamper screws to the casing
Insulation on internal components	Insulation on internal components
10 bar district heating pressure	10 bar district heating pressure
Ability to run pipes behind unit	Ability to run pipes behind unit
Modulating pump	Modulating pump
System flushing valve as accessory	System flushing valve as accessory

All Greenstar HIU options come with a heat meter.

*Our KE and E models are BESA 2018 registered.

Design support services

Whether designing a new build, retrofit or deep renovation heat network, our design support team can help with guidance for early stage designs to configure energy centres, HIU selections and everything in between.

Using our simulated heat network, the training academy can test specific design parameters against our range of HIU to give confidence that design matches in use characteristics.

- ▶ Supporting your design stages through HNTAS
- ▶ Helping to ensure minimum heat losses
- ▶ Supporting your product configurations
- ▶ BIM level 2 covering entire product range
- ▶ Design and schematic reviews
- ▶ Dedicated Bosch consultant assigned to you
- ▶ District Heating CPD available.

For more information or to discuss a project, please call our design team on **0330 123 3004**, or email us at: **commercial.industrial@uk.bosch.com**
