Boiler Plus legislation made easy

Boiler Plus standards aim to improve home energy efficiency by providing greater choice, control, and savings on energy bills.

The standard is set to make timers and room thermostats a must-have for all gas and oil systems, giving consumers the power to achieve the greatest comfort in the home.

When a gas combination boiler is installed, an additional energy efficiency measure is required. This requirement is designed to be flexible, allowing a suitable choice to be made that reflects the diverse nature of the housing stock, and the needs of the household. The energy saving technologies that can be used to comply are:

▶ Load Compensation
▶ Weather Compensation
▶ Smart controls featuring automation and optimisation functions
▶ Flue gas heat recovery systems

Rest assured, we've got you covered.

Collect loyalty points for every installation

Bosch EasyControl Adapter
Part no. 7 736 701 560

▶ The adapter allows the EasyControl to be compatible with other manufacturer's boilers through OpenTherm protocols or boilers with a 230V room thermostat connection. When connected via a 230V connection, only central heating can be controlled.

Individual Smart TRV
Part no. 7 736 701 575

▶ Decide heating times and temperatures for individual rooms with the Bosch EasyControl.
▶ When installing Smart TRVs, along with our EasyControl Adaptor, a smart TRV must be installed in the same zone as the EasyControl wall unit.
▶ For optimum performance we recommend Smart TRVs are installed on all radiators.
▶ Child-lock setting through EasyControl App.

Bosch EasyControl TRV set
Part no. 7 736 701 555
(1 white EasyControl, 3 Smart TRVs)
Part no. 7 736 701 556
(1 black EasyControl, 3 Smart TRVs)

+5% BOILER PLUS READY

Bosch Smart Individual Room Thermostat
Part no. 8 750 001 003 (230V)
Part no. 8 750 001 004 (24V)

▶ Offer multi-zone control in combination with the EasyControl, for systems with radiators and/or water-based underfloor heating.
▶ Control the temperature on the device or remotely via the Bosch EasyControl app.
▶ Flexible time schedules can be set, via the app, to individual rooms or areas e.g. upstairs and downstairs.

Greenstar Sense controls

Greenstar Sense I intelligent room thermostat
Part no. 7 738 110 054

+3%

▶ Load compensation feature for increased efficiency.
▶ Boiler output automatically adjusted to precisely meet the heat demand of the property at maximum efficiency.
▶ Maximises the condensing boiler's operation.
▶ Perfect when replacing an existing, less efficient wired room thermostat.

Greenstar Sense II weather compensation controller
Part no. 7 738 111 064

BOILER PLUS READY

+4% *

▶ Intelligently interacts with the boiler to provide weather compensation via a wired outdoor sensor.
▶ Solar thermal optimisation in conjunction with MS100 or MS200 solar module.
▶ Displays the amount of energy recovered from a solar system.
▶ Service reminder function.

*4% when installed via a BUS connection & weather compensation mode enabled.

Greenstar Comfort+ controls

Greenstar Comfort+ I RF (4000 & 8000+ only)
Part no. 7 738 112 323

+3% BOILER PLUS READY

▶ Pre-paired wireless room thermostat and RF key receiver.
▶ Load compensation for enhanced efficiency.
▶ Plug and play installation.

Greenstar Comfort+ II RF
Part no. 7 738 112 324

+3% BOILER PLUS READY

All the features of Greenstar Comfort+I RF while also including:

▶ 6 adjustable CH temperatures for each set-point per day.
▶ Programme and control CH and DHW at the room thermostat - perfect for boilers that are not easily accessible.
▶ Compatible with our Comfort+ Wireless Outdoor Weather Sensor (Part no. 7 738 112 343). Boosts the heating system's ErP rating by an extra +1% compared to standalone Comfort+ II.
▶ Not compatible with the 1000 boiler.

12 Year Guarantee†

Up to a 12 year guarantee. The guarantee of our EasyControl, Comfort and Sense range will match the Worcester Bosch boiler that it is installed with†.

†Terms and conditions apply.

Wiring modules
Greenstar Wiring Centre
Part no. 7 738 110 116

MS100 and MS200 intelligent solar module
MS100 Part no. 7 738 110 144
MS200 Part no. 7 738 110 146

▶ Specially designed interface that integrates a solar heating system with a gas-fired system boiler.

▶ Works in conjunction with a solar-compatible weather or load compensation unit such as the Sense II. MS200 unit allows integration of more complex solar heating systems, including east / west split or swimming pools.

Weather sensors
Wired outdoor weather sensor
Part no. 7 716 192 764

**Comfort+ wireless outdoor weather sensor

Accessories

Greenstar System Filter Range
Part no. 7 733 600 266 (22mm mini)
         7 733 600 236 (22mm)
         7 733 600 237 (28mm)
         7 733 600 476 (22mm brass)

▶ **Isolation valve indicators**
   Can be opened using a single 90º turn, with red and green
   indicators showing when the filter is in operation.

▶ **Mini System Filter**
   Designed for installs with space restrictions as it is
   54mm smaller in height than the normal 22mm filter.

▶ **Brass System Filter**
   Precision engineered, robust filter, with a large capacity,
   that is both easy to install and clean. The brass filters have
   a bypass, making it easy to remove and clean while the
   boiler continues to operate.

**Collect loyalty points
for every installation**

Greenstar Intelligent Filling System*
Part no. 7 738 112 911

▶ Compatible with Greenstar 4000 and 8000+ range combi
  boilers.

▶ This industry-first revolutionary software allows the
  internal filling valve to automatically fill the heating system.

▶ Once optimum pressure has been reached, the integrated
  filling valve will automatically stop and close.

▶ Will recognise if there is a leak in the system and will not
  automatically fill the system.

▶ It also alerts your customer if the heating system is losing
 too much pressure.

Worcester Keyless Filling Link
Part no. 7 716 192 610

▶ WRAS approved.
▶ Simple lever operation, no key or hose required.
▶ No risk of the end user losing or misplacing the filling link.
▶ For safe use as a filling link with the domestic water supply.

*In order for the Intelligent Filling System to work successfully, there must be an
appropriate level of water pressure from the mains supply. The minimum required
is 1.5 bar standing pressure.

Worcester CondenseSure
Part no. 7 716 192 746

▶ No electrical supply needed.
▶ Compatible with all gas boilers.
▶ Installation flexibility.

Greenstar 4000 SimpleSwitch flue adaptor (60/100mm)
Part no. 7 733 601 245

This adaptor allows you to use the same vertical or horizontal sideways flue run hole through the external wall of the property when replacing an i Junior or Si boiler.

Greenstar 1000 Kit

Greenstar 8000+ Kit
Vertical Pre-piping Assembly Kits
Part no. 7 736 902 627 (1000)
Part no. 7 716 192 607 (8000+ Style, 8000+ combi & system)
Part no. 7 733 601 250* (CDi Compact, 4000 combi, 4000 System and i System Compact).

Our Vertical Pre-piping Assembly Kits come pre-bent with swaged ends for easy soldering. This can save you approximately 30 minutes on installation time. Gas pipe and sleeves not included in 7 733 601 250.

*i System Compact includes two 15mm copper pipes for use with an optional diverter valve.

Rear Spacer Frames
Part no. 7 736 902 620 (1000)
Part no. 7 736 902 361 (2000)

Our Rear Spacer Frames allow for wall mounting with space behind the boiler for vertical piping, leading to a quicker and neater installation.

Gas System Care Packs

With a system filter included, fitting any of our System Care Packs allow you to offer up to a 12 year guarantee on our gas boiler range*.

Wireless Bosch EasyControl System Care Pack

Part no. 7 733 600 433
▶ Bosch EasyControl (white) & EasyControl RF Key
▶ EasyControl Table Stand
▶ Greenstar Mini System Filter (22mm)
▶ Greenstar WB1 Inhibitor 265ml Bottle
▶ Greenstar WB3 Cleaner 265ml Bottle

Suitable for our Greenstar 2000, 4000 and 8000+ range boilers.

Greenstar Connected System Care Pack

Part no. 7 733 601 377

▶ Bosch EasyControl (white) & EasyControl RF Key
▶ EasyControl Table Stand
▶ Greenstar Intelligent Filling System
▶ ADEY MagnaClean Pro3 Sense System Filter (22mm)
▶ Greenstar WB1 Inhibitor 265ml Bottle
▶ Greenstar WB3 Cleaner 265ml Bottle

Suitable for our Greenstar 4000 and 8000+ range boilers.

See pages 42-45 for additional accessories needed with our controls when fitted with our system and regular boilers.

Greenstar Comfort+ II RF System Care Pack

Part no. 7 733 600 401
▶ Greenstar Comfort+ II RF & Key
▶ Greenstar Mini System Filter (22mm)
▶ Worcester Keyless Filling Link
▶ Greenstar WB1 Inhibitor 265ml Bottle
▶ Greenstar WB3 Cleaner 265ml Bottle

Greenstar Comfort+ II suitable for our Greenstar 2000, 4000 and 8000+ range boilers.
Greenstar Comfort II RF System Care Pack

Part no. 7 733 601 214

▶ Greenstar Comfort II RF & Receiver
▶ Greenstar Mini System Filter (22mm)
▶ Worcester Keyless Filling Link
▶ Greenstar WB1 Inhibitor 265ml Bottle
▶ Greenstar WB3 Cleaner 265ml Bottle

Suitable for our Greenstar CDi compact.

	7 716 191 085	45° flue bend
	7 716 191 164	Vertical flue adaptor
	7 733 600 048*	High level horizontal telescopic flue kit (383 - 603mm)
	7 716 191 177	Support bracket kit
	7 716 191 178	Support bracket kit (6 pack)
	7 716 191 090	Flashing – flat roof
	7 716 191 091	Flashing – pitched roof
	7 716 191 086	Plume management kit (60mm dia.)

*For use with high level horizontal flue adaptor and flue adaptor
 part number 8 718 682 324 0. Also requires a flue clamp fitting
 part number 8 716 116 815.

125mm diameter		
	7 716 191 157	Standard horizontal flue kit (965mm)
	7 716 191 158	Vertical 1,365mm BF kit (inc. adaptor)
	7 719 003 666	Extension flue kit (960mm)
	7 719 003 664	90° flue bend
	7 719 003 665	45° flue bend
	7 716 191 165	Vertical flue adaptor
	7 716 191 179	Support bracket kit
	7 716 191 090	Flashing – flat roof
	7 716 191 091	Flashing – pitched roof

ℭondensfit Ⅱ FLOOR STANDING

Gas flue terminal positioning

1. The terminal must not cause an obstruction nor the discharge a nuisance. Particular care should be exercised with regards to the pluming of the flue gases and any increase in noise levels.

2. If a terminal is fitted less than 2 metres above a surface to which people have access, then a guard must be fitted. The terminal guard must be securely fixed to the wall using suitable plugs and corrosion resistant screws. The guard must be symmetrically positioned about the terminal assembly and spaced such that there is a gap of 50mm between the end of the terminal and the guard. This applies to the air intake and exhaust terminal when a plume management kit is used.

3. In certain weather conditions, a white plume of condensation will be emitted from the flue terminal and siting where this could be a nuisance should be avoided e.g. near security lighting.

The flue system must be installed and terminated in accordance with the manufacturer's instructions and recommendations of BS 5440:Part 1.

Note

▶ **Please refer back to the installation manuals for product specific clearances**

▶ **All measurements are the minimum clearances required**

▶ **Terminals must be positioned so as to avoid combustion products entering the building**

▶ **Support the flue at approximately one metre intervals and at a change of direction, use suitable brackets and fittings. Flue support bracket kit part numbers:**
7 716 191 177 (100mm dia.)
7 716 191 178 (100mm dia. x 6)
7 716 191 179 (125mm dia.)

▶ **Installations in car ports are not recommended**

▶ **The flue cannot be lower than 1,000mm from the top of a light well due to the build up of combustion products**

▶ **Dimensions from a flue terminal to a fanned air inlet to be determined by the ventilation equipment manufacturer**

▶ **A flue terminal guard shall be fitted whenever a terminal or air inlet is fitted less than 2,000mm above ground, above a balcony or above a flat roof to which people have access.**

Key to illustration –
horizontal flue terminal positions (see page 58)

1. 200mm below eaves and 75mm below gutters, pipe and drains.

2. The dimension below eaves, gutters, pipes and drains can be reduced to 25mm, as long as the flue terminal is extended by 100mm past any overhang. The telescopic flue joint must be sealed with suitable silicone sealant if it is external to the building.

3. 300mm adjacent to a boundary line, unless it will cause a nuisance. BS 5440: Part 1 recommends that care is taken when siting terminal in relation to surfaces or boundary lines.

4. 1,200mm separation measured between terminals facing each other.

5. 600mm distance to a surface or boundary line facing a terminal, unless it will cause a nuisance. BS 5440: Part 1 recommends that care is taken when siting terminal in relation to surfaces or boundary lines.

6. The terminal must be at least 1,500mm from the opening or vent when sited below the window or 600mm when sited to either side or above.

7. 600mm diagonally to an opening door, air vent or opening window.

8. 1,200mm separation measured between a vertical flue and a horizontal flue terminal.

9. For the purpose of determining suitable flue terminal positions for gas appliances, the boundary can be considered to extend to the centre line of any adjacent routes or waterways e.g. paths, streets, rights of way, canals, rivers or railways.

10. 300mm to an internal or external corner. 300mm above a surface, such as the ground/ floor level or roof surface.

    *If the terminal section is less than 150mm and has two screws securing it to the elbow, the terminal section will not require a supporting bracket. However, the flue terminal can only be cut down to a minimum of 130mm.

11. 300mm above, below and either side of an opening door, air vent or opening window.

12. Below ground level in an open lightwell. The flue must be at least 600mm from the opposing surface and have at least 300mm clearance either side and below. The flue terminal must be no more than 1,000mm from the top of the lightwell.

13. Flues should clear any LPG storage by 1,000mm horizontally and 300mm above.

14. Proximity of flue duct outlet to boundaries, 2,000mm distance to an opening in adjacent building facing a terminal. BS 5440: Part 1 recommends that care is taken when siting terminal in relation to boundary lines.

15. 300mm from an opening or vented window, 150mm to a manufactured fixed unvented window.

16. The dimension below eaves, balconies and car ports can be reduced to 25mm, as long as the flue terminal is extended by 100mm past any overhang. The telescopic flue joint of the terminal must be sealed with suitable silicon sealant if it is external to the building.

Plume management

Condensfit II™ plume management system

Part numbers
60mm dia. plume management kit

Comprises:
1 x terminal bend
1 x extension 500mm
1 x outlet assembly
1 x clamp pack

7 716 191 086

Accessories

Condensfit II™

Components	Part no.	Description
60mm diameter		
	7 716 191 086	Plume management kit (60mm dia.)
	7 716 191 087	Extension (1,000mm) kit
	7 716 191 088	90º Bend
	7 716 191 089	45º Bend (pair)
	7 716 191 176	Plume management terminal guard round
	8 716 111 2750	Plume management clamp

For every 90º plume management kit bend deduct 1,500mm and 750mm for every 45º plume management kit bend.

Plume management kits

Plume management kits are available for 100mm horizontally terminated flues. Please refer to the installation instructions supplied with the plume management kits.

> **For more information on plume lengths and reduced flue terminal clearances, please read the relevant boiler installation manual.**

## Key to illustration – vertical flue terminal positions (see page 62)

1. 1,500mm measured between a vertical flue terminal and an opening or vented window. 500mm measured horizontally between a vertical flue terminal and an opening or vented window providing the flue terminal is at least 300mm above the opening.

2. Minimum clearance to an additional flue, 600mm to a room sealed flue or 1,500mm to an open flue.

3. 300mm clearance from a vertical flue terminal adjacent to a boundary line, unless it will cause a nuisance. BS 5440: Part 1 recommends that care is taken when siting a terminal in relation to boundary lines.

4. 600mm minimum clearance measured from an opening or vented skylight to a vertical flue terminal. If the terminal is within 1,500mm of the opening or vented skylight then it must be at least 300mm above the opening.

5. 500mm clearance measured horizontally from a vertical flue to a vertical structure. Not required if the terminal is 300mm above the structure.

6. The flue must not penetrate the roof in the shaded area. The terminal must be at least 1,500mm from the opening or vent when sited below the window or 600mm when sited to either side or above.

7. 400mm measured diagonally from a pitched roof or 500mm in regions with heavy snow fall. 300mm measured vertically from the air intake to the closest intersection with the roof.

8. 1,200mm separation measured between a vertical flue and a horizontal flue terminal.

9. For the purpose of determining suitable flue terminal positions for gas appliances, the boundary can be considered to extend to the centre line of any adjacent routes or waterways e.g. paths, streets, rights of way, canals, rivers or railways.

10. 1,500mm measured between a vertical flue terminal and an opening or vented window. 500mm measured horizontally between a vertical flue terminal and an opening or vented window providing the flue terminal is at least 300mm above the opening.

Note
▶ **Where a vertical flue terminates in an area that is enclosed on 3 sides, the flue must be no more than 1,000mm below the lowest roof line. You must ensure that all clearances are maintained and that products of combustion disperse safely from the area.**

†Available to Loyalty Programme members only. Non-WAIs can achieve this extended guarantee length with an additional payment of £40. Terms and conditions apply.

Greenstar Heatslave II External combi
Space-saving brilliance

A
A++ → G

B
A → G

Dimensions	
Width	640mm
Height	950mm
Depth	770mm
Clearances	
Above	600mm
RH/LH flue outlet on opposite side	10mm
RH flue outlet on rear	300mm
LH flue outlet on rear	10mm
Rear = flue outlet on side	50mm
Rear = rear flue outlet	2,500mm

It is strongly recommended that the flue terminal faces away from walls to reduce the possibility of wetting occurring.

Models and outputs

Boiler output (kW)	Flow rate (ΔT 40ºC FOR A 90 LITRE DRAW OFF)	Part no.
Greenstar Heatslave II External combi 12/18		
12 to 18	15*	7 731 600 263
Greenstar Heatslave II External combi 18/25		
18 to 25	18*	7 731 600 264
Greenstar Heatslave II External combi 25/32		
25 to 32	22*	7 731 600 265

*Restricted DHW flow rate.

Flue lengths

Maximum flue lengths (mm)				
Diameter	External kit	12/18	18/25	25/32
80mm	Plume management	5,000	5,000	4,000

Note: For every 90º flue bend deduct 1,000mm and 500mm for every 45º flue bend. For every 90º plume kit bend deduct 1,000mm and 500mm for every 45º plume kit bend.

Flue damper (7 716 190 101) required on all lengths for all models except the 25/32kW model when set at 25kW or 28kW.

Boiler comes with standard horizontal flue kit. A 90º bend is required when fluing to the side.

Heatslave II Internal and External controls

Bosch EasyControl
Smart internet-connected controller

Bosch EasyControl controller
Part no. 7 736 701 341 (white)
Part no. 7 736 701 392 (black)

BOILER PLUS READY

+1%

▶ Decide times and temperatures for heating and hot water, all from your smart device.
▶ Easy to use and set up with simple displays and intuitive app.
▶ Requires just a 2-core wire connection between the control and the boiler.

Bosch EasyControl TRV set
Part no. 7 736 701 555
(1 white EasyControl, 3 Smart TRVs)

Part no. 7 736 701 556
(1 black EasyControl, 3 Smart TRVs)

BOILER PLUS READY

+1%

Bosch EasyControl Adapter
Part no. 7 736 701 560

Individual Smart TRV
Part no. 7 736 701 575

▶ Decide heating times and temperatures for individual rooms with the Bosch EasyControl.
▶ When installing Smart TRVs, along with our EasyControl Adaptor, a smart TRV must be installed in the same zone as the EasyControl wall unit.
▶ For optimum performance we recommend Smart TRVs are installed on all radiators.

Bosch Smart Individual Room Thermostat
Part no. 8 750 001 003 (230V)
Part no. 8 750 001 004 (24V)

▶ Offer multi-zone control in combination with the EasyControl, for systems with radiators and/or water-based underfloor heating.
▶ Flexible time schedules can be set, via the app, to individual rooms or areas e.g. upstairs and downstairs.

Collect loyalty points for every installation

Greenstar Comfort controls

Greenstar Comfort I RF wireless room thermostat and plug-in twin channel programmer*
Part no. 7 733 600 001

BOILER PLUS READY
+1%

▶ Enhanced load compensation for increased efficiency.
▶ Extremely reliable RF signal.
▶ Simple menu navigation.

Greenstar Comfort II RF wireless programmable room thermostat and plug-in RF receiver*
Part no. 7 733 600 002

BOILER PLUS READY

+1%

All the features of Comfort I while also including:

▶ 6 adjustable heating temperatures per day.
▶ Set programme at the room thermostat.

Comfort wall plate kit
Part no. 7 733 600 039

Weather sensors
Wired outdoor weather sensor**

Bosch EasyControl Adapter
Part no. 7 736 701 560

▶ The adapter allows the EasyControl to be compatible with other manufacturer's boilers through OpenTherm protocols or boilers with a 230V room thermostat connection. When connected via a 230V connection, only central heating can be controlled.

Individual Smart TRV
Part no. 7 736 701 575

▶ Decide heating times and temperatures for individual rooms with the Bosch EasyControl.

▶ When installing Smart TRVs, along with our EasyControl Adaptor, a smart TRV must be installed in the same zone as the EasyControl wall unit.

▶ For optimum performance we recommend Smart TRVs are installed on all radiators.

▶ Child-lock setting through EasyControl App.

Bosch Smart Individual Room Thermostat
Part no. 8 750 001 003 (230V)
Part no. 8 750 001 004 (24V)

▶ Offer multi-zone control in combination with the EasyControl, for systems with radiators and/or water-based underfloor heating.

▶ Control the temperature on the device or remotely via the Bosch EasyControl app.

▶ Flexible time schedules can be set, via the app, to individual rooms or areas e.g. upstairs and downstairs.

Accessories

Greenstar System Filter Range
Part no. 7 733 600 266 (22mm mini)
7 733 600 236 (22mm)
7 733 600 237 (28mm)
7 733 600 476 (22mm brass)

▶ **Isolation valve indicators**
Can be opened using a single 90º turn, with red and green indicators showing when the filter is in operation.

▶ **Mini System Filter**
Designed for installs with space restrictions as it is 54mm smaller in height than the normal 22mm filter.

▶ **Brass System Filter**
Precision engineered, robust filter, with a large capacity, that is both easy to install and clean. The brass filters have a bypass, making it easy to remove and clean while the boiler continues to operate.

Greenstar Low Loss Header
Part no. 7 716 192 614

Compatible with our Utility and Danesmoor internal oil boilers. A ready-made solution for the connection of two Greenstar system or regular boilers on a sealed heating system with a combined output of up to 70kW.

Worcester CondenseSure
Part no. 7 716 192 746

▶ Not suitable for external oil boilers.
▶ No electrical supply needed.
▶ Installation flexibility.

Plume management

Condensfit II™ plume management system

Part numbers
80mm dia. plume management kit

Comprises:
1 x terminal bend
1 x extension 500mm
1 x outlet assembly
1 x clamp pack

7 716 190 092

Accessories

ondensfit II™

Components	Part no.	Description
80mm diameter		
	7 716 190 092	Plume management kit
	7 716 190 093	1,000mm extension
	7 716 190 095	90° bend
	7 716 190 094	45° bend (pair)

For every 90º plume management kit bend deduct 1,000mm and 500mm for every 45º plume management kit bend.

Oil floor-standing external boiler flues

Greenstar Oilfit EXTERNAL

Components	Part no.	Description
125mm diameter		
	7 716 190 034	Internal 90° flue bend (used inside boiler when fluing to side)
	7 716 190 050	Flue terminal guard

Oil flue terminal positioning

1. Where a flue is terminated less than 600mm away from a projection above it and the projection consists of plastics or has a combustible or painted surface, then a heat shield of at least 750mm wide should be fitted.

2. If the lowest part of the terminal is less than 2m above the ground, balcony, flat roof or other place to which any person has access, the terminal should be protected by a guard.

3. Notwithstanding the dimensions given above, a terminal should not be sited closer than 300mm to combustible material. In the case of a thatched roof, double this separation distance should be provided. It is also advisable to treat the thatch with a fire retardant material and close wire in the vicinity of the flue.

4. It is essential that a flue or chimney does not pass through the roof within the shaded area delineated by dimensions Q and R.

5. Where protection is provided for plastic components, such as guttering, it is essential that this is to the standard specified by the manufacturer of the plastic components.

Key to illustration (see page 96)

1. 1,500mm vertically between terminals on the same wall.

2. 1,000mm below eaves, gutters, pipes and drains. External telescopic flue joints must be sealed with suitable silicon sealant.

3. 1,500mm measured horizontally between a vertical flue terminal and a window, dormer window or opening.

4. 1,200mm between terminals facing each other.

5. Vertical flue clearance, 600mm adjacent to a boundary line unless it will cause a nuisance. BS 5410: Part 1 2014 recommends that care is taken when siting terminal in relation to boundary lines.

6. 2,500mm to a boundary line, unless it will cause a nuisance. It is recommended that care is taken when siting terminal in relation to boundary lines.

7. 300mm minimum clearance from a non opening skylight to a vertical flue.

8. Vertical flue clearance, 750mm to non-combustible building material, and 1,500mm clearance to combustible building material.

9. 1,000mm above, below and either side of an opening door, air vent or opening window. These clearances are required by BS 5410 Part 1:2014 to reduce a possible pluming nuisance, this could be reduced to 600mm if there was no pluming nuisance, seek guidance from the local authority building control.

10. 600mm diagonally to an opening door, air vent or opening window.

11. 300mm to an internal or external corner.

12. 1,000mm below a Velux window for a vertical flue, 300mm above or either side of the Velux window. The terminal must be at least 1,000mm from the Velux when measured horizontally.

13. The flue must extend at least 600mm above the roof and 400mm horizontally from a pitched roof or 500mm in regions with heavy snow fall.

14. 1,500mm clearance to any vertical structure on a roof or room sealed flue that has a height difference of more than 300mm.

15. 1,000mm below eaves and gutters and sanitary pipe and 300mm from vertical sanitary pipes and drains.

16. Flue clearance must be at least 300mm from the ground. Terminal guards must be fitted if the flue is less than 2 metres from the ground or if a person could come into contact with the flue terminal.

17. 2,500mm to a surface facing a terminal, but must not be installed where it will cause a nuisance.

18. Terminals must be at least 1,800mm from an oil storage tank unless a wall with of at least 30 minutes fire resistance and extending 300mm wider and higher than the tank is between the tank and the terminal.

19. For the purpose of determining suitable flue terminal positions for the appliances, the boundary can be considered to extend to the centre line of any adjacent routes or waterways e.g. paths, streets, rights of way, canals, rivers or railways.

Plume management

Plume management kits are available for 125mm horizontally terminated flues. Please refer to the installation instructions supplied with the plume management kits.

For more information on our plume management options, including reduced flue terminal clearances, please read the flue manual.

Oil flue terminal positioning

All measurements in millimetres

RIDGE FLUE

RIDGE VENT

BOUNDARIES

BOUNDARY LINE

*If there is more than 300mm height difference, then the distance between the vertical outlet should be 1,500mm.

Green Storage WB Range unvented cylinders

Compliant with Building Regulation G3

25 Year Guarantee†

▶ G3 kit included.

▶ Larger capacity cylinders, with 7 variants from 90 up to 300 litres - all offering high flow rates**.

▶ Can be installed with our system diverter valve kit.

▶ Rapid re-heat times with excellent levels of heat retention.

▶ Factory installed G3 temperature and pressure relief valve.

▶ Quiet operating cylinder - only 15db(A).

▶ 5 year guarantee on components†.

▶ 25 year guarantee on the stainless steel cylinder body†.

▶ Benchmark, Hot Water Association and Kiwa approved.

Bosch Commercial and Industrial

Offering a broad portfolio that covers all heating and cooling requirements

**Expand your business with
Bosch Commercial and Industrial**

The products and support services you can access gives you the chance to expand your business offering and provide installations for:
▶ Large domestic properties.
▶ Hotels, guest houses and holiday parks.
▶ Sports and leisure centres.
▶ Education and healthcare facilities.
▶ Mini district heating schemes.

Wall-hung commercial solutions

▶ Gas boilers with individual outputs from 50kW to 145kW.
▶ Ability to cascade in banks up to 860kW when operating at 50:30.
▶ Heat Interface Units with hot water flow rates of 15 l/min and 21 l/min.
▶ Range of digital and smart controls, including our industry first internet-connected commercial heating control.

Floor-standing solutions

▶ Condens 7000 F & FP floor-standing boiler, with outputs from 75kW to 1MW.
▶ Our industrial steam and hot water boilers are available in electric and gas-fired, meaning they can help maximise efficiency, reduce operational costs and minimise downtime.

For more information please call **0330 123 3004**

Bosch Climate Air Conditioning Units

Pictured is our Bosch Climate Single Split Air to Air Heat Pump.

5 Year Guarantee†

Heats and cools homes, small businesses and offices.

Installer benefits

▶ Power output adjusts to match the demand to avoid frequent compressor start-up/shut down and to increase energy efficiency*

▶ Operates with the highest SEER efficiency rating over the majority of the operating time

▶ The powerful DC inverter compressor and the exterior fan motor are used to adjust the air flow and volume

▶ Straightforward to install and maintain

▶ Low GWP refrigerant R32.

*In cooling mode.

Homeowner benefits

▶ Compact design, requiring only an outside wall

▶ Inbuilt air filtration is perfect for allergy sufferers

▶ Control your air conditioning from your smart phone via Bosch HomeCom Easy app (requires optional accessories)

▶ Turbo mode increases fan speed to reach the required temperature more quickly

▶ Sleep function. Controls ambient temperature during the night.

Training
Trade-rated training

Born from 35+ years of experience, our renowned training solutions offer bespoke, expert training for our entire product range.

Learn how to specify, install, service and maintain by getting the inside scoop on all our appliances.

Trusted by thousands
Every year 14,000+ installers trust us to keep their skills up to speed.

Training on tap
Choose from training academies, mobile trainers or online courses.

Our complete range
From legacy and new products to future-proofing your business.

Online introduction courses

Learn online wherever you are, at a pace that suits you.

Visit our online Training Academy to get your learning journey started.

Join our 'Worcester Bosch Training Academy' Facebook group for online courses and training videos.
Product training courses

Our training courses will help you get hands-on experience to understand all the features and benefits, specification, installation and servicing of our products.

We have training Academies in: Wakefield, Clay Cross, Worcester, West Thurrock and Dublin.

Book on to a course at:
worcester-bosch.co.uk/eacademy

MCS courses

Becoming MCS certified is a mark of excellence as an installer. We're here to support you with our range of MCS courses including:

▶ Water regulations certification (WRAS) course
▶ Level 3 Award Low temperature heating and hot water systems in dwellings
▶ Level 3 Award RQF installation and maintenance of air source heat pump systems

Not MCS certified?

We can support you with unlocking government grants and extended guarantees. If MCS isn't right for your business right now, you can use our third party MCS umbrella scheme – who will handle the design, training and MCS accreditation paperwork to enable your customer to apply for government grants.
